### Data in many forms. . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

### How to obtain more information

Inquiries about this publication and related statistics or services should be directed to the Statistics Canada reference centre in:

### How to order publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, Ontario, K1A 0V7.

### Des données sous plusieurs formes. . .

Statistique Canada diffuse des données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms, et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

### Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée aux centres de référence de Statistique Canada à:

## INTRODUCTION

This report presents final results of the 1981 Census of Agriculture. The Introduction includes definitions of terms used in Census of Agriculture reports, and contains some indicators of the quality of the data. The tabular material is presented in three parts. The first part contains tables of comparable data from previous censuses. The second part presents tables that provide current data for provinces or census divisions. The third part consists of summary data cross-classified by such factors as size, sales class and type of farm. A copy of the questionnaire used in the 1981 Census of Agriculture, and an index map of geographical areas used in the Census are found in the Appendices.

## WHY A CENSUS OF AGRICULTURE

The Census of Agriculture has been taken every five years since 1951 and every ten years from 1871 to 1951. It compiles statistics on crops, livestock, farm land, labour, capital, and many other variables that are significant to the public and private sectors. A commonly asked question is "Why is the tabulation of these variables so important?" Quite simply, much of the demand for agricultural statistics is derived from the policy objectives of the food and agriculture sector. These objectives can be related to:

the supply to society of high quality food at reasonable prices and

the assurance of a decent living to efficient farmers.

Their attainment depends in part on the efficient operation of commodity markets and agricultural statistics play an important role because efficiency improves when all participants have equal access to good information. The Agriculture Statistics Division of Statistics Canada is continually striving to produce superior data and to make them accessible to all interested parties. This goal is being achieved via the Census of Agriculture and intercensal surveys. Surveys keep information updated between census years. They use the census as a benchmark and also as a source from which to draw samples.

Agricultural statistics are an essential analytical tool for a wide variety of situations. The following examples illustrate some major uses of the Census of Agriculture data:

- 1) Private firms use census small area data to help determine the best markets for new products.

## INTRODUCTION

Ce bulletin présente les résultats définitifs du recensement de l'agriculture de 1981. On trouvera dans l'introduction les définitions des termes employés dans les bulletins du recensement de l'agriculture ainsi que quelques indications de la qualité des données. Les tableaux ont été répartis en trois catégories: le premier jeu fait état de données comparables provenant des recensements antérieurs; le deuxième porte sur les données actuelles au niveau des provinces ou des divisions de recensement, tandis que le troisième illustre des données sommaires recoupées selon des variables comme la taille, et le genre d'exploitation agricole la catégorie des ventes. Un exemplaire du questionnaire du recensement de l'agriculture de 1981 et une carte-index des régions géographiques utilisées au recensement figurent dans les annexes.

## POURQUOI UN RECENSEMENT DE L'AGRICULTURE?

Entre 1871 et 1951, le recensement de l'agriculture a eu lieu tous les dix ans, mais depuis 1951, on le réalise tous les cinq ans. Il permet de produire des statistiques sur les cultures, les stocks de bétail, l'utilisation des terres agricoles, la main-d'oeuvre et la valeur en capital de la ferme ainsi que sur de nombreuses autres variables. On nous demande souvent pourquoi la totalisation statistique de ces variables est si importante. C'est très simple. Les statistiques agricoles sont produites principalement en réponse aux objectifs énoncés aux termes de la politique agricole et alimentaire, laquelle vise à:

fournir aux consommateurs des produits de haute qualité à des prix raisonnables et

assurer des conditions de vie décentes aux agriculteurs.

Étant donné que la réalisation de ces objectifs repose en partie sur des marchés sains, les statistiques agricoles jouent un rôle important puisque l'efficacité augmente lorsque toutes les parties intéressées ont accès à des données fiables et exactes. La Division de la statistique de l'agriculture de Statistique Canada cherche continuellement à produire des données de haute qualité et à les rendre accessibles à tous ceux qui en ont besoin. C'est grâce au recensement de l'agriculture et aux enquêtes intercensitaires qu'elle peut d'ailleurs y parvenir. Les enquêtes assurent la mise à jour des données en période intercensitaire, alors que le recensement sert de repère et de source pour le tirage des échantillons.

Les statistiques agricoles constituent un instrument d'analyse essentiel dans diverses applications. Par exemple:

- 1) Les entreprises privées font appel aux données du recensement sur les petits secteurs afin de cerner les marchés qui se prêtent le mieux au lancement de nouveaux produits.

- 2) Public agencies need good information in policy development.
- 3) Agricultural researchers use census data to analyse trends and developments in the industry.
- 2) Les organismes publics ont besoin de données fiables et exactes pour mettre au point les politiques.
- 3) Les chercheurs agricoles utilisent les données du recensement pour analyser les changements et les tendances qui se manifestent dans cette industrie.

## METHODOLOGY

The 1981 Census of Agriculture was collected with the 1981 Census of Population and Housing. The enumerators were asked to enquire at each household, where they made contact, if anyone in the household operated a census farm. Enumerators were also asked to identify all agricultural operations in their enumeration area and the corresponding operators. Each operator was asked to complete the agriculture questionnaire. The completed questionnaires were checked by the enumerator and forwarded to Statistics Canada Head Office in Ottawa. The information on the questionnaires was converted to machine readable form, checked for consistency and data were substituted for any missing values. The final data were analysed for accuracy and summarized for public release.

## EXPLANATION OF TERMS

### Census Farm

The basic unit for which a questionnaire was collected was termed a "census farm". This term is defined in the 1981 Census as a farm, ranch or other agricultural holding with sales of agricultural products during the past 12 months of \$250 or more. Operations which anticipated sales of \$250 or more in 1981 were also included.

The definition is different from that used in recent censuses in that the requirement for 1 acre or more of land has been dropped and the sales limit has been changed from \$50. Where comparisons between 1981 data and previous censuses are shown, the data for 1981 using the \$250 definition are compared to data using the \$50 definition from previous censuses.

### Operator

This term is used in the Census of Agriculture to designate the person who is responsible for the day-to-day decisions made in the operation of the holding. As only one operator is listed for each census-farm, the number of operators is the same as the number of census-farms. If the holding was operated as a partnership, only one partner was considered to be the operator.

## MÉTHODES

Le recensement de l'agriculture de 1981 a été mené en même temps que le recensement de la population et du logement. Les recenseurs devaient demander, à chaque ménage qu'ils visitaient, si quelqu'un exploitait une ferme de recensement. Ils devaient aussi repérer toutes les exploitations agricoles dans leur secteur de dénombrement et, ultérieurement, leurs exploitants. Chaque exploitant était prié de remplir le questionnaire de l'agriculture, que le recenseur vérifiait et transmettait ensuite au Bureau central de Statistique Canada à Ottawa. Les réponses furent converties sous forme ordiolingue, leur cohérence fut contrôlée, puis des valeurs furent attribuées lorsque certaines données avaient été omises. Enfin, on vérifia l'exactitude des données définitives et on les résuma pour fins de publication.

## EXPLICATION DES TERMES

### Ferme de recensement

On a appelé "ferme de recensement" l'unité de base pour laquelle un questionnaire du recensement a été recueilli. On l'a définie au recensement de 1981 comme une ferme, un ranch ou une autre exploitation agricole dont les ventes de produits agricoles au cours des 12 derniers mois se sont élevées à \$250 ou plus. Les exploitations prévoyant des ventes de \$250 ou plus en 1981 étaient incluses aussi.

Cette définition diffère sur deux points de celle qui a été employée aux recensements antérieurs: d'abord, le critère prévoyant une superficie de base d'une acre ou plus a été abandonné, puis le seuil des ventes fixé à \$50 a été modifié. Lorsque nous présentons des comparaisons entre les données du recensement de 1981 et celles de recensements antérieurs, les données de 1981 utilisant le seuil de \$250 sont comparées à celles utilisant le seuil de \$50.

### Exploitant

Ce terme est employé au recensement de l'agriculture pour désigner la personne qui prend au jour le jour les décisions nécessaires à la bonne marche de l'exploitation. Comme on n'inscrit qu'un exploitant par ferme, leur nombre est égal au nombre de fermes de recensement. Lorsqu'une ferme est exploitée par des associés, un seul est considéré comme étant l'exploitant.

## Age of Operator

The operator was asked to report his/her age on his/her last birthday by indicating a five year interval between 15 to 69 years and 70 years and over.

## Residence of Operator

The length of time the operator lived on the holding during the 12-month period prior to the census was recorded as 9-12 months, 5-8 months, 1-4 months or did not live on this holding.

## Type of Organization

Data presented in this bulletin are classified by type of agricultural holding as:

- (1) An individual or family operation
- (2) A partnership with a written agreement
- (3) A partnership with no written agreement
- (4) A legally constituted company
  - (a) with the shares owned mostly by him and his family, or
  - (b) with most of the shares owned by some other person(s) or business
- (5) Other

Farms operated by institutions, community pastures, lands operated privately for an estate or trust company, Hutterite colonies and co-operative farms were included in "other" type of organization.

## Tenure of Land

Agricultural holdings are classified by tenure depending on whether the operator owns or rents from others, or both. Area owned includes land that an operator or spouse holds under title, homestead law, purchase contract, or as an heir or trustee of any individual estate and land more or less permanently occupied by a squatter. Areas rented or leased from others include land rented or leased from others on a cash basis, rented on a share crop basis from others, areas used rent-free, and areas used under lease arrangement with federal, provincial or municipal governments. Note that land used under a per head grazing fee is not included. A hired manager was asked to report whether the land operated by him/her was owned or rented by his/her employer.

## Âge de l'exploitant

On a demandé à l'exploitant de déclarer son âge à son dernier anniversaire en indiquant l'intervalle de cinq ans approprié (entre 15 et 69 ans) ou s'il avait 70 ans et plus.

## Résidence de l'exploitant

La période durant laquelle l'exploitant a habité dans l'exploitation au cours des 12 mois précédant la date du recensement a été indiquée comme suit: 9-12 mois, 5-8 mois, 1-4 mois, et n'y a pas habité.

## Forme juridique

Les données présentées dans ce bulletin sont classées selon la forme juridique de l'exploitation:

- (1) Ferme individuelle ou familiale
- (2) Société en nom collectif avec convention écrite
- (3) Société en nom collectif sans convention écrite
- (4) Entreprise constituée en corporation
  - (a) dont la plupart des actions sont détenues par l'exploitant et sa famille, ou
  - (b) dont la plupart des actions sont détenues par d'autres personnes ou entreprises.
- (5) Autre

Les fermes exploitées par des institutions, les pâturages communautaires, les terres exploitées par un particulier à titre d'héritier ou de fiduciaire d'une succession, les colonies huttérites et les fermes coopératives ont été classés dans la catégorie "autre".

## Mode d'occupation

Les exploitations agricoles sont classées selon qu'elles appartiennent à l'exploitant ou qu'elles sont prises en location ou les deux. La superficie possédée comprend les terres que l'exploitant ou son conjoint détient en vertu d'un titre de propriété, d'une loi sur les exploitations agricoles, d'un contrat d'achat ou à titre d'héritier ou de fiduciaire d'une succession et les terres occupées de façon plus ou moins permanente par un squatter. La superficie prise en location comprend les terres prises en location moyennant paiement en espèces, les superficies exploitées à la part (métayage), celles pour lesquelles il n'est pas payé de loyer et celles qui appartiennent aux administrations fédérale, provinciales ou locales. Il est à noter que les terres utilisées en vertu d'un permis ou d'un droit de pacage par tête ne sont pas comprises. On a demandé à tous les gérants d'indiquer si les terres qu'ils ou elles exploitaient appartenaient à leur employeur ou étaient louées par ceux-ci ou celles-ci.

## Total Farm Areas

Crown lands, usually pasture land, which were operated under a lease arrangement with federal, provincial or municipal governments, are reported as part of the farming operation of the person to whom the land was leased. However, land which was used under a per head grazing permit or fee is not included.

Large areas of timber land or other non-agricultural land held by the operator, but operated apart from the farm business, are excluded.

The area of farms reported at any geographic level represents the area of land operated by farmers whose headquarters are located in that geographical unit. Therefore, any part of the operation located outside that unit will be included inside it and the reported area will be different from the actual agricultural area within the boundaries of that unit. This discrepancy tends to become less significant as the number of farms in the unit increases.

## Use of Land

All farm land is classified according to use under two major divisions: improved land and unimproved land. Data in the land use tables may not add exactly in some cases due to rounding.

### Improved Land

The area of improved land consists of the total of the areas reported for the following four land categories: crop land, improved pasture, summerfallow and other improved land.

(1) **Cropland** - Included in this item is the total area of land sown or to be sown for harvest in 1981. Cropland includes the total area of all field crops, plus the areas of fruits, vegetables, greenhouses, mushroom houses and nursery products. The sum of the individual crops is not necessarily equal to cropland since occasionally two crops may be harvested from the same land in one year and crops reported in fractions of acres are rounded.

(2) **Improved pasture** - All land which was being used for pasture or grazing and which has had some improvements made to it in recent years is included. Improvements include cultivation, drainage, irrigation, fertilization, seeding or spraying.

## Superficie totale des fermes

Les terres de la Couronne, habituellement des pâturages, qui étaient exploitées en vertu d'un bail conclu avec l'administration fédérale, provinciale ou locale, sont déclarées comme faisant partie de l'exploitation agricole de la personne à qui la terre a été louée. Toutefois, les terres utilisées en vertu d'un permis ou d'un droit de pacage par tête de bétail ne sont pas prises en compte.

Les grandes terres à bois ou autres terres non agricoles appartenant à un exploitant, mais non exploitées comme entreprises agricoles, ne sont pas comptées.

La superficie des fermes déclarée à tout niveau géographique représente la superficie des terres exploitées par les exploitants agricoles dont le siège est situé dans l'unité géographique. Par conséquent, toute partie d'une ferme située en dehors de cette unité sera déclarée comme se trouvant à l'intérieur de celle-ci, et la superficie déclarée sera différente de la superficie réelle des terres agricoles situées dans l'unité. Cet écart s'amointrit à mesure que s'accroît le nombre de fermes dans une même unité.

## Utilisation de la terre

Toutes les terres agricoles sont classées suivant leur utilisation dans deux catégories principales: terre améliorée et terre non améliorée. Dans certains cas, la somme des chiffres présentés dans les tableaux sur l'utilisation de la terre peut ne pas correspondre aux totaux indiqués à cause de problèmes d'arrondissement.

### Terre améliorée

La superficie de terre améliorée est la somme des superficies déclarées appartenant aux quatre catégories suivantes: terre en culture, pâturage amélioré, jachères et autre terre améliorée.

(1) **Terre en culture** - Cette rubrique comprend la superficie totale des terres en culture ensemencées ou à ensemer pour la récolte de 1981. La terre en culture comprend la superficie de toutes les grandes cultures plus les superficies des fruits et des légumes, serres, champignonnières et produits de pépinière. La somme des superficies cultivées peut s'écarter de la superficie totale des terres en culture pour deux raisons: la récolte de deux cultures sur la même terre au cours d'une année, et l'arrondissement des chiffres lorsque les superficies en culture sont inférieures à une acre.

(2) **Pâturage amélioré** - Est incluse toute terre utilisée comme pâturage ou pacage et améliorée de quelque façon ces dernières années. Les améliorations peuvent comprendre: mise en culture, drainage, irrigation, fertilisation, ensemencement ou pulvérisation.

(3) **Summerfallow** - The enumerator was instructed to include in this item land from which no crop was to be harvested during 1981, but which was to be cultivated, worked or sprayed during the year for weed control and for moisture conservation.

Areas where the crop was ploughed under as green manure were enumerated as summerfallow, but land ploughed or cultivated in the summer after a crop (such as hay or fall rye) had been harvested, was to be enumerated as cropland.

(4) **Other improved land** - This item includes the area of barnyards, home gardens, lanes and roads on farms. It also includes areas of cultivated land that were lying idle, being neither summerfallowed nor cropped, and areas of new breaking that had not been seeded to a crop.

### Unimproved Land

The area of unimproved land consists of the total areas reported for woodland and other unimproved land.

(1) **Woodland** - This includes farm woodlots, land leased for cutting, sugar bush and cut-over land with young growth which has or will have value as timber, fuelwood or Christmas trees. The area of trees planted for wind-breaks was also to be included. It excludes large timber tracts which are run as a separate business from the farm. There is some evidence that changes in the area of this item between censuses may be due to differences in interpretation. This would be particularly true in areas of bushland.

(2) **Other unimproved land** - Areas of native pasture or hay land that had not been cultivated, brush pasture, grazing or waste land, sloughs, marsh and rocky land, etc., are all included in this item.

### Crops

The area of crops in 1981 represents the areas planted or to be planted for harvest in 1981, as reported by the respondent at the time of enumeration.

Actual harvested acreages may vary from the census report due to changes in planting intentions or crop failure which occurred after the date of enumeration. In the case of hay land, where two or more cuttings of hay are taken, the acreage was to be reported only once.

(3) **Jachères** - Le recenseur avait pour instruction de prendre en compte dans cette rubrique les terres qui n'allaient pas produire de récolte en 1981, mais qui seraient cultivées, labourées ou poudrées au cours de l'année pour empêcher la croissance des mauvaises herbes et conserver l'humidité.

Les superficies dont les cultures ont été enfouies pour constituer de l'engrais vert ont été comptées comme jachères, mais les terres labourées ou cultivées en été après la récolte d'une culture (de foin ou de seigle d'automne, par exemple) devaient être comptées comme terres en culture.

(4) **Autre terre améliorée** - Cette rubrique comprend la superficie des basses-cours, jardins potagers, chemins et routes dans les fermes de recensement. Elle comprend également les superficies de terre cultivée qui sont demeurées incultes, n'ayant pas été mises en jachères ni en culture et les superficies de nouveaux labours qui n'avaient pas étéensemencées en vue d'une récolte.

### Terre non améliorée

La superficie de terre non améliorée représente les superficies totales de terres à bois et boisés de ferme et autre terre non améliorée.

(1) **Terre à bois et boisés de ferme** - Cette rubrique comprend les terres à bois et les boisés de ferme, les terres louées pour la coupe du bois, les érablières et les terrains déboisés où se trouvent des jeunes pousses ou des arbres qui ont ou auront de la valeur comme sciages, bois de chauffage ou arbres de Noël. La superficie des brise-vent devait également être prise en compte. Ne comprend pas les grandes sections de coupe du bois exploitées indépendamment de la ferme. Il se peut que les variations de superficie à cette rubrique d'un recensement à l'autre proviennent des différences d'interprétation, notamment pour ce qui est des superficies de buissons.

(2) **Autre terre non améliorée** - Les superficies de pâturages naturels ou les terres à foin non cultivées, les pâturages en broussailles, les terres incultes ou de pacage, les marécages, les marais et les terres rocailleuses, etc., sont tous pris en compte dans cette rubrique.

### Cultures

La superficie des cultures en 1981 représente les superficies ensemencées ou à ensemençer pour la récolte de 1981, telles que déclarées par le recensé au moment du recensement.

Les superficies effectivement récoltées peuvent différer de celles qui ont été déclarées au recensement par suite de changements dans la superficie de culture projetée ou de récoltes manquées qui se sont produits après la date du recensement. Dans le cas des terres à foin qui donnaient deux ou plusieurs récoltes, la superficie ne devait être déclarée qu'une seule fois.

Tree fruits were reported only when there were 25 fruit trees or more on the holding.

The area of potatoes, vegetables and small cultivated fruits was to be reported only when these products were being grown mainly for sale.

### **Fertilizer Use**

The application of commercial fertilizer during 1980 and in the fall of 1979 was recorded in terms of area fertilized and tonnes used. The question was broken down by area of cropland other than hay, area of hay, and area of improved pasture. Each acre was counted only once regardless of the number of applications. Lime was not considered to be commercial fertilizer.

### **Spraying and Dusting**

The area to which sprays or dust were applied in 1980 for control of weeds and brush and/or insects and disease was reported. This includes herbicides, fungicides, insecticides and soil sterilants. Chemicals used on livestock or in farm buildings were excluded.

### **Irrigation**

Irrigation is defined as the application of water to the land by artificial means such as a system of ditches, furrows, sprinklers or similar works including the purchase of custom irrigation. Farm operators were asked to report the existence of an irrigation system on the holding on June 3, 1981, the total area irrigated in 1980, and the area irrigated by sprinkler in 1980. Irrigation of home grounds or gardens was excluded.

### **Livestock and Poultry**

Livestock and poultry were reported on the holdings where they were located, regardless of ownership, except for livestock kept on community pastures. In this case, livestock are related to the holding of the operator owning them rather than to the community pasture.

Where an agricultural holding was located in more than one geographical unit, the location of the total holding was determined by its headquarters, regardless of the dispersion of parts of the holding. In consequence, livestock and poultry located anywhere on such a holding on June 3, 1981 were reported as though they were in the same geographical unit as the headquarters.

Les fruits de verger étaient déclarés seulement quand il y avait au moins 25 arbres fruitiers dans l'exploitation.

La superficie de pommes de terre, de légumes et de petits fruits cultivés devait être déclarée seulement quand ces produits étaient cultivés surtout pour la vente.

### **Engrais utilisé**

L'épandage d'engrais en 1980 et à l'automne de 1979 a été indiqué sur le questionnaire en termes de superficie fertilisée et de tonnes utilisées. La question portait sur les superficies de terre en culture sans le foin, les superficies de foin et les pâturages améliorés. Chaque superficie fertilisée a été comptée une seule fois sans tenir compte du nombre d'épandages. La chaux n'a pas été considérée comme étant un engrais commercial.

### **Pulvérisation et poudrage**

Les répondants devaient indiquer les superficies qui ont fait l'objet en 1980 de pulvérisation et de poudrage contre les mauvaises herbes et les broussailles, et contre les insectes et les maladies. Cela comprenait les herbicides, insecticides, fongicides et les substances stérilisantes. Les produits chimiques utilisés sur le bétail et dans les bâtiments de ferme n'ont pas été comptés.

### **Irrigation**

On définit l'irrigation comme étant l'aspersion des terres par des moyens artificiels comme des systèmes de fossés, de sillons, des appareils d'aspersion et d'autres moyens similaires, y compris l'irrigation faite sur commande. On a demandé aux exploitants agricoles de déclarer s'ils utilisaient un système d'irrigation dans leur exploitation au 3 juin 1981, la superficie totale irriguée en 1980 et la superficie totale au moyen d'appareils d'aspersion en 1980. L'irrigation des jardins potagers ou des terrains non agricoles n'a pas été prise en compte.

### **Bétail et volaille**

Le bétail et la volaille ont été pris en compte dans la ferme où ils se trouvaient, quel qu'en fût le propriétaire, à l'exception du bétail élevé dans un pâturage communautaire. Dans ce cas, le bétail a été rattaché à l'exploitation de son propriétaire plutôt qu'au pâturage communautaire.

Si une exploitation agricole était composée de parties situées dans plusieurs unités géographiques, leur situation était déterminée d'après le siège de l'exploitation, quelle que soit la dispersion des parties de l'exploitation. Par conséquent, le bétail et la volaille qui se trouvaient dans une partie quelconque d'une telle exploitation, le 3 juin 1981, étaient déclarés dans l'unité géographique où était situé le siège de l'exploitation.

The 1981 Census defined cows as "all cows and heifers which had calved at least once" and "heifers, 1 year and over (which have never calved)". This differs from the 1976 Census which asked for "cows and heifers, 2 years and over" and "heifers, 1 year and under 2".

### Capital Values

This is the value of census-farm capital: land and buildings, machinery and equipment (including automobiles), livestock and poultry. Farm operators were asked to give a value for land and buildings, as well as values for farm machinery and equipment located on their holding regardless of ownership. The value reported was to be an estimate of the market value, not the original, replacement or assessed value.

The value to be reported for farm machinery was the present market value - that is, the amount for which the machinery and equipment would sell if there was a willing buyer and a willing seller and not a forced sale. It might be explained as the price the machine would likely bring in its present condition at an auction sale. The original or replacement value was not to be reported unless it coincided with the market value.

The total value of machinery and equipment includes the value of items not reported separately as well as the value of the machines which were reported separately.

Values for the livestock and poultry reported in the census were compiled from data on average farm values for various types of livestock and poultry.

### Machinery and Equipment

The number and value were to be reported for agricultural machines on the holding at the census date, regardless of whether the machines were owned by the operator or someone else. Old machines no longer being used were not to be reported. Equipment owned in partnership was to be reported on the holding where it was located.

### Hired Agricultural Labour

Total weeks of paid agricultural labour (15 years and over) hired during the past 12 months were recorded. Year-round and seasonal labour was recorded separately.

Dans le cas des vaches au recensement de 1981, il fallait compter "toutes les vaches et génisses ayant vêlé au moins une fois" et "les génisses de un an et plus (n'ayant jamais vêlé)". Ces instructions diffèrent de celles du recensement de 1976 qui prescrivaient de compter les "vaches et génisses de deux ans et plus" et les "génisses d'un an et de moins de deux ans".

### Valeur des biens

Il s'agit de la valeur en capital de la ferme de recensement: terres et bâtiments, machines et matériel (y compris automobiles), bétail et volaille. Les exploitants de ferme devaient indiquer la valeur de la terre et des bâtiments, des machines et du matériel qui se trouvaient dans leur exploitation, quel que fût le mode d'occupation. La valeur indiquée devait être une estimation de la valeur marchande, non pas la valeur initiale, la valeur de remplacement ou la valeur imposée.

La valeur à indiquer pour les machines agricoles était la valeur marchande actuelle, c'est-à-dire le prix auquel les machines se vendraient advenant un vendeur et un acheteur libres d'effectuer la transaction. En d'autres termes, c'était le prix que la machine, dans son état actuel, rapporterait probablement à l'enchère. Ni la valeur initiale ni la valeur de remplacement ne devait être indiquée à moins qu'elle ne correspondît à la valeur marchande.

La valeur totale des machines et du matériel comprend la valeur des articles non déclarés séparément ainsi que celle des machines déclarées séparément.

Les valeurs des bestiaux et des volailles déclarées au recensement ont été tirées des données sur les valeurs moyennes à la ferme pour différents types de bestiaux et de volailles.

### Machines et matériel

Le nombre et la valeur des machines agricoles se trouvant dans l'exploitation le jour du recensement, qu'elles appartiennent ou non à l'exploitant, devaient être déclarés. Les vieilles machines qui ne servent plus ne devaient pas être comptées. Le matériel possédé en commun avec un associé devait être déclaré dans l'exploitation où il se trouvait.

### Main-d'oeuvre agricole engagée

Le nombre total de semaines de travail agricole payé effectué par des travailleurs âgés de 15 ans et plus au cours des 12 derniers mois a été déclaré. Les travailleurs agricoles employés toute l'année et la main-d'oeuvre saisonnière ont été indiqués séparément.

Any person doing agricultural work on the holding for wages, salary, commission or on a piece-rate or labour contract basis was reported as paid labour. This included paid managers and members of the operator's family receiving regular or specified cash wages. Total weeks of agricultural work done by members of a Hutterite colony were not included as hired agricultural labour.

### **Selected Expenditures**

Farm operators were asked to report expenditures incurred for selected items for 1980 whether already paid or to be paid. Rent paid for agricultural land and buildings leased from others included any taxes paid by the operator. The estimated dollar value for shared rent was reported. Cash wages to hired labour included unemployment insurance, workmen's compensation and Canada Pension Plan premiums, and other benefits paid on behalf of the employee but it excluded the cost of custom work. Purchases of feed and supplements included all feed purchased and feed supplied under livestock or poultry contracts for use on the holding. Purchases of seed and seedlings for use on the farm included seed supplied under production contracts but excluded the costs of treatment, cleaning or planting. Purchases of fertilizers and lime excluded any application charges. Agricultural chemical purchases included herbicides, fungicides, insecticides, soil sterilants, pesticides, defoliants and seed treatments excluding the cost of application. Expenditures for machine rental and custom work excluded contract work for the construction of farm buildings. The cost of fuel, oil and lubricants included only the part used in farm machinery and in the heating of farm buildings. Non-farm share of automobiles and heating of the farm house was excluded. Repairs and maintenance to farm machinery excluded any cost incurred to improve or change machinery. Repairs and maintenance to farm buildings and fences excluded any costs to erect new buildings or fences. Only the farm business share of electricity consumed on the farm was reported.

### **Forest Products and Maple Tappings**

The value of forest products sold in 1980 included sales of Christmas trees, fuelwood, logs and income received from stumpage leases where an agreed amount is

Toute personne effectuant du travail dans l'exploitation contre salaire, traitement, commission, rémunération à la pièce ou suivant un contrat de travail, a été déclarée comme main-d'oeuvre rémunérée. Celle-ci comprend les gérants engagés et les membres de la famille de l'exploitant qui reçoivent un salaire en argent, régulier ou spécifique. Le nombre total de semaines de travail agricole exécuté par les membres d'une colonie hutterite n'a pas été compté comme semaines de travail agricole payé.

### **Certaines dépenses**

On a demandé aux exploitants agricoles de déclarer certaines dépenses faites en 1980 à des fins agricoles, qu'elles soient déjà réglées ou à régler. Le loyer des terres et des bâtiments pris en location comprenait aussi les taxes payées par l'exploitant. La valeur estimative du loyer partagé a été déclarée. Les salaires versés aux travailleurs agricoles engagés comprenaient les cotisations à l'assurance-chômage, les primes du régime d'indemnisation des accidents du travail et du Régime de pensions du Canada, et d'autres contributions versées au nom des employés, mais il ne fallait pas déclarer le coût du travail sur commande. Les achats d'aliments du bétail et de compléments comprenaient les aliments achetés et fournis en vertu de contrats concernant l'élevage de bétail et de volailles dans l'exploitation. Les achats de semences et de plants à utiliser dans l'exploitation agricole comprenaient les semences fournies en vertu de contrats de production, mais les coûts de traitement, de nettoyage ou de plantation en étaient exclus. Les frais d'épandage étaient exclus des achats d'engrais et de chaux. Les achats de produits agro-chimiques à déclarer par le répondant comprenaient les herbicides, fongicides, insecticides, substances stérilisantes, pesticides, défoliants et produits pour le traitement des semences, mais non les coûts d'épandage. Les coûts de travaux à contrat pour la construction de bâtiments de ferme étaient exclus des dépenses au titre de la location de machines et du travail sur commande. Le coût du carburant, de l'huile et des lubrifiants comprenait la part des frais liés à l'utilisation des machines agricoles et au chauffage des bâtiments de ferme. La part des frais d'automobile qui n'étaient pas imputables à l'exploitation agricole et des frais de chauffage de la maison de ferme n'ont pas été pris en compte. Les frais de réparation et d'entretien des machines agricoles ne comprenaient pas les frais d'amélioration ou de remplacement des machines. Les frais de construction de bâtiments et de clôtures étaient exclus des frais de réparation et d'entretien des bâtiments et des clôtures de ferme. Seule la consommation d'électricité aux fins de l'exploitation agricole a été déclarée.

### **Produits de la forêt et entailles d'érables**

La valeur des produits de la forêt vendus en 1980 comprenait les ventes d'arbres de Noël, de bois de chauffage, de billes et les revenus tirés de la location

paid for the privilege of cutting timber or pulpwood from the land. The number of taps in maple trees in the spring of 1981 was reported.

#### **Off-farm Work During the Past 12 Months**

Farm operators were asked to report the number of days worked off the holding at paid agricultural and non-agricultural work during the previous 12 months. Exchange work was not to be included while custom work was included as agricultural work off the holding.

#### **Product Type**

Each census farm with sales of \$2,500 or more was classified according to its predominant production enterprise. The method used involved the estimation of potential sales from the inventories of crops and livestock reported on the questionnaire. Each of these potential sales was accumulated to derive a potential total sales. The commodity or group of commodities which accounted for 51% or more of total potential sales determined the product type assigned to that farm. The product types include dairy, cattle, hogs, poultry, wheat, small grains other than wheat, field crops other than small grains, fruits and vegetables, miscellaneous specialty (greenhouses, nurseries, mushroom houses, sheep, horses, apiaries, fur farms and goats), and mixed farms (livestock predominant, field crops predominant or other combinations).

#### **Conversion of "Imperial" to "Metric"**

This report presents area data in metric (hectares) as well as imperial (acres) units. This conversion from acres to hectares was made by Statistics Canada using the factor 0.404 685 6 hectare equals one acre. Where areas are reported in square feet, the metric equivalent used is square metres. The conversion factor is 0.092 903 04 square metre equals one square foot. Data expressed in metric units may not add exactly due to rounding.

#### **Conversion of Arpents to Acres**

In the province of Quebec, some respondents reported land areas in arpents. The conversion to acres was made by Statistics Canada using the factor 1,000 arpents equal 845 acres.

de terres à bois lorsqu'un montant convenu est versé pour le privilège de couper du bois debout ou du bois à pâte sur cette terre. Le nombre d'entailles d'érables faites au printemps de 1981 a été déclaré par les répondants.

#### **Travail hors ferme au cours des 12 derniers mois**

On a demandé aux exploitants agricoles de déclarer le nombre de jours qu'ils ont travaillé en dehors de l'exploitation à des travaux agricoles ou non agricoles rémunérés, au cours des 12 derniers mois. Le travail d'échange n'a pas été retenu mais le travail sur commande devait être compris dans le travail agricole hors ferme.

#### **Genre du produit**

Chaque ferme de recensement enregistrant des ventes de \$2,500 ou plus a été classée selon sa production principale. La méthode employée a consisté à évaluer les ventes éventuelles en fonction des stocks de produits cultivés et de bétail déclarés sur le questionnaire. On a additionné la valeur de ces ventes éventuelles pour obtenir leur valeur totale. Le produit ou le groupe de produits qui représentait 51 % ou plus du total des ventes éventuelles a permis de classer la ferme de recensement. Parmi les genres du produit, mentionnons: lait, bétail, porcs, volailles, blé, céréales secondaires autres que le blé, grandes cultures que les céréales secondaires, fruits et légumes, spécialités diverses (serres, pépinières, champignonnières, chevaux, moutons, abeilles, chèvres et animaux à fourrure) et fermes diversifiées (avec prédominance du bétail, des grandes cultures ou autres combinaisons).

#### **Conversion d' "impérial" à "métrique"**

Ce bulletin présente les données de superficie en unités métriques (hectares) ainsi qu'en unités impériales (acres). La conversion d'acres en hectares a été faite à Statistique Canada en employant le facteur 0.404 685 6 hectare égale une acre. Quand les superficies sont déclarées en pieds carrés, l'équivalent métrique employé est le mètre carré. Le facteur de conversion est 0.092 903 04 mètre carré égale un pied carré. Certains chiffres métriques ayant été arrondis, leur somme peut ne pas correspondre exactement aux totaux indiqués.

#### **Conversion des arpents en acres**

Dans la province de Québec, certains recensés ont exprimé l'étendue des superficies en "arpents". La conversion en acres a été faite à Statistique Canada en utilisant le facteur suivant: 1,000 arpents égalent 845 acres.

## AVAILABILITY OF ADDITIONAL INFORMATION

The data presented in this bulletin represents only the most frequently requested tabulations. Data for small geographical areas are available on request as photocopies of computer printout, on microfiche or magnetic tape. Specific requests for data not already tabulated may also be serviced. Details of the methodologies for the processing of the data are not described in the text but may be of interest to selected users. Further information may be obtained by contacting: Agriculture Division, Census of Agriculture Section, User Services Unit, Statistics Canada, Ottawa K1A 0T6, (613) 995-4936.

## CONFIDENTIALITY

All data released by the Census of Agriculture are subject to the confidentiality restrictions of Statistics Canada. To prevent disclosure of confidential material, data for areas of less than 10 farms will not be published separately, but merged with a geographically adjacent area. Also, certain data have been suppressed to prevent disclosure of operations of an identifiable individual agricultural holding. In such cases, the relevant data cell will be replaced with an "x".

## QUALITY OF DATA

The 1981 Census of Agriculture was designed to obtain complete and accurate data from all farms in Canada. It is inevitable, however, in a statistical undertaking of the size and complexity of the census, that errors will occur.

Because of the many potential sources of error, an important part of census planning is to identify these potential sources so that appropriate quality controls can be built into the census operations. For 1981, each returned questionnaire was checked for completeness, and wherever expected information was missing or inconsistent follow-up contacts were made to obtain the correct data. Where missing values could not be obtained or discrepancies reconciled, values were imputed.

## DISPONIBILITÉ DES DONNÉES SUPPLÉMENTAIRES

Les données de ce bulletin représentent seulement les totalisations le plus souvent demandées. Les utilisateurs peuvent obtenir sur demande des données pour de petites régions géographiques sous la forme de photocopies d'imprimés d'ordinateur, sur microfiches ou sur bandes magnétiques. Nous pouvons aussi donner suite aux demandes de données qui ne sont pas déjà totalisées. Le détail des méthodes du traitement des données n'est pas décrit dans le texte mais il peut être d'intérêt à certains utilisateurs. Pour de plus amples renseignements, prière de s'adresser à la Division de l'agriculture, Section du recensement de l'agriculture, Sous-section des services aux utilisateurs, Statistique Canada, Ottawa K1A 0T6, (613) 995-4936.

## CONFIDENTIALITÉ

Toutes les données du recensement de l'agriculture sont soumises aux restrictions qu'impose Statistique Canada pour protéger leur caractère confidentiel. Par conséquent, pour empêcher la divulgation de renseignements secrets, les données pour les régions comptant moins de 10 exploitations agricoles ne seront généralement pas publiées mais seront incorporées à celles d'une région voisine. De même, certaines données ont été supprimées de façon à éviter la divulgation des opérations d'une exploitation agricole identifiable. Pour ces cas particuliers, les données pertinentes seront remplacées par un "x" dans les tableaux.

## QUALITÉ DES DONNÉES

Le recensement de l'agriculture de 1981 devait servir à recueillir des données complètes et précises sur toutes les fermes au Canada. Toutefois, vu la complexité et la taille de l'entreprise statistique que représente le recensement, des erreurs se produisent inévitablement.

En raison du grand nombre de sources possibles d'erreurs, les planificateurs du recensement s'attachent à cerner ces sources de façon à pouvoir intégrer aux opérations du recensement des contrôles qualitatifs appropriés. Au recensement de 1981, tous les questionnaires reçus ont été vérifiés pour voir s'ils étaient complets et, lorsque des renseignements attendus manquaient ou étaient contradictoires, un suivi était effectué afin d'obtenir les bonnes données. Lorsqu'il était impossible d'obtenir les données manquantes ou de solutionner les incohérences, il a fallu les imputer.

Data produced by the census undergo a quality assessment. To date there has been some preliminary evaluation and more extensive evaluation projects are under way. Full results will be published in Statistics Canada publication **Evaluation of Data Quality**, catalogue No. 96-918 in early 1983.

The following provides indications of the quality of data from the 1981 census based on preliminary evaluation.

### Coverage

Coverage errors are inherent in any census and are generally rather difficult to measure. In order to get an appreciation of the net effect of these errors, the 1981 count of census farms was compared with an independent estimate derived from two Statistics Canada probability surveys: the Agriculture Enumerative Survey (AES), and the Farm Enumerative Survey (FES), both conducted in July of 1981. Preliminary indications are that some under-coverage exists and it appears to be at about the same level as in previous censuses.

### Non-Response

In addition to undercoverage, the census is also subject to non-response. Non-response to the entire questionnaire is usually attributable to refusal to complete the form or the farmer's absence from the farm when the census is taken. This information is ultimately obtained through follow-up or through legal means, but it is generally too late to include in the results. In the 1981 Census, non-response amounted to less than 0.5 per cent.

### Impact of Imputation

Where follow-up contacts are unsuccessful in obtaining missing information and systematic checking fails to resolve problems of inconsistent data, an imputation procedure is used to calculate likely approximations of the actual values. In general, imputed values make up a small proportion of the totals. For the 1981 census, less than 0.3 per cent of the totals for the question on farm area was imputed, and about 1.0 per cent of the total for cattle and pigs was imputed.

### Specific Issues

The data received for some questions, for a variety of reasons, are too unreliable for publication. Thus the following items have been deleted:

Les données produites par un recensement font l'objet d'une évaluation de qualité. Jusqu'à maintenant, certaines études préliminaires ont eu lieu et d'autres plus poussées sont en cours. Les résultats complets paraîtront dans la publication de Statistique Canada intitulée **Évaluation de la qualité des données**, n° 96-918 au catalogue, au début de 1983.

On trouvera dans les paragraphes suivants une indication, fondée sur une étude préliminaire, de la qualité des données tirées du recensement de 1981.

### Champ d'observation

Les erreurs d'observation, inhérentes à tout recensement, sont généralement assez difficiles à mesurer. Pour avoir une idée de l'effet net de ces erreurs, nous avons comparé le nombre d'exploitations agricoles relevées lors du recensement de 1981 à une estimation distincte dérivée de deux enquêtes probabilistes de Statistique Canada: l'Enquête descriptive de l'agriculture (EDA) et l'Enquête sur les exploitations agricoles (EEA), toutes deux effectuées en juillet 1981. Les indications préliminaires démontrent qu'un certain sous-dénombrement existe et qu'il semble être du même ordre qu'aux recensements antérieurs.

### Non-réponse

Outre le sous-dénombrement, on retrouve au recensement des cas de non-réponse. Lorsqu'il s'agit de tout le questionnaire, on attribue habituellement la non-réponse au refus de remplir la formule ou à l'absence de l'agriculteur de sa ferme lorsque le dénombrement a eu lieu. En fin de compte, les renseignements sont obtenus par moyen de suivies ou de lois, mais ceci est généralement trop tard pour qu'ils soient inclus dans les résultats. Au recensement de 1981, la non-réponse s'élève à moins de 0.5 pour cent.

### Répercussions de l'imputation

Lorsque nous ne pouvons obtenir les données manquantes en communiquant avec le recensé et que les vérifications systématiques ne peuvent permettre de résoudre les problèmes d'incohérence, on utilise une méthode d'imputation pour calculer le chiffre qui se rapprocherait vraisemblablement le plus de la valeur réelle. En général, les valeurs imputées représentent une petite proportion des totaux. Au recensement de 1981, moins de 0.3 % des totaux à la question sur la superficie des fermes ont été imputés, tandis que pour le bétail et les porcs, l'imputation représente 1.0 % du total.

### Certains résultats

Les données recueillies dans certaines questions, pour de diverses raisons, ne sont pas fiables. Ainsi, les détails suivants sont exclus de nos publications:

**Colonies of Bees** - For all of Canada. An alternate source of data is the Statistics Canada publication **Honey Production**, catalogue No. 23-007.

**Share Rent** - For Atlantic Canada and Quebec.

**Forage Seed** - For Atlantic Canada, Quebec and Ontario.

**Total Irrigation** - For Atlantic Canada, Quebec and Ontario.

Caution is advised with respect to the following items:

**Fruit Trees** - Winter kill in 1981 destroyed a significant number of fruit trees, especially apple trees, in Eastern Canada. Quebec was particularly hard hit. On Census Day, June 3, 1981, the extent of damage was still undetermined and consequently the number of trees reported does not reflect fully the number of trees lost and thus is overstated.

**Area of Sod, Grapes, Strawberries, Raspberries and Asparagus** - Although farmers were asked to report the area they anticipated harvesting in 1981, in some instances they reported the area planted.

**Days of Off-Farm Work** - Respondents were asked to report the days worked in 1980. Many who work full-time off the farm reported 365 days, and therefore total days are overstated. This bias has existed in previous censuses.

**Colonies d'abeilles** - de tout le Canada. On peut cependant consulter d'autres données à ce sujet en se reportant à la publication de Statistique Canada intitulée **Production de miel**, n°23-007 au catalogue.

**Loyer à la part** - de l'Atlantique et au Québec.

**Semences de plantes fourragères** - dans les provinces de l'Atlantique, au Québec et en Ontario.

**Irrigation totale** - dans les provinces de l'Atlantique, au Québec et en Ontario.

La prudence est avisée en ce qui a trait aux détails suivants:

**Arbres fruitiers** - En 1981, le gel a détruit un grand nombre d'arbres fruitiers, plus particulièrement des pommiers, dans l'est du Canada. Le Québec a été très touché. Le jour du recensement, c'est-à-dire le 3 juin 1981, on n'avait pas encore précisé l'étendue des dégâts ce qui fait que le nombre d'arbres déclarés ne tient pas entièrement compte du nombre d'arbres perdus et est ainsi exagéré.

**Superficie du gazon, du raisin, des fraises, des framboises et des asperges** - Bien que l'on ait demandé aux agriculteurs d'indiquer la superficie qu'ils comptaient récolter en 1981, certains ont déclaré la superficieensemencée.

**Jours de travail hors exploitation** - Les recensés devaient indiquer le nombre de jours travaillés en 1980. Bon nombre de ceux qui ont travaillé à plein temps en dehors de leur exploitation ont indiqué 365 jours, ce qui a fait gonfler le total à cet égard. Le même biais s'est retrouvé aux recensements précédents.

**Aux francophones**

Si ce questionnaire anglais vous a été remis par erreur et si vous désirez un questionnaire français, veuillez demander à la téléphoniste préposée aux appels interurbains le numéro ZENITH 0-1981 à compter du 28 mai, 9 heures à 21 heures; celle-ci vous mettra en communication, sans frais, avec le bureau de recensement le plus près, qui vous fera parvenir la version française du questionnaire.

**The Legal Requirement for the Census**

The Census of Canada is taken under the authority of the Statistics Act, which requires everyone to provide the information requested.

**Legal Confidentiality**

The information you give will be kept confidential and used only for the production of statistics. No one will see the answers you give except for employees sworn to secrecy under the Statistics Act. Persons who have been sworn under the Statistics Act are subject to prosecution and legal penalties if they disclose personal census information.

**INSTRUCTIONS**

- Complete this questionnaire if you operate a farm, ranch or other agricultural holding with sales of agricultural products during the past 12 months of \$250 or more.
- The holding or operation is all land you operate, regardless of ownership or location.
- Agricultural products include any of the following:
  - livestock and poultry
  - dairy products and eggs
  - field crops
  - fruits or vegetables
  - mushrooms, greenhouse and nursery products
  - fur bearing animals
  - honey and beeswax
  - maple products
- Answer all questions that apply to your holding. Mark the "Yes", "No" and "None" boxes, where they apply, with an "X".
- Use your records, if possible. Otherwise, enter your best estimate.
- Do not report fractions except where space has been provided.

- For Telephone Assistance, call the long distance operator and ask for ZENITH 0-1981; and you will be connected to the nearest Census Office, without charge.

**Note:**

- If you wish to report your land area in metric, check the "Metric" box below and answer the area questions in metric units (hectares instead of acres, square metres instead of square feet).

"Metric" ☐ 024

- In some regions of the Province of Quebec the land is surveyed in arpents. If your holding is in one of these regions, check the "Arpents" box below and answer the area questions in arpents.

"Arpents" ☐ 025

PLEASE COMPLETE THIS QUESTIONNAIRE ON JUNE 3, 1981.  
THEN KEEP IT FOR THE CENSUS REPRESENTATIVE  
WHO WILL PICK IT UP. DO NOT MAIL.

**Section I — OPERATOR AND RESIDENCE, JUNE 3, 1981**

- The operator is the person responsible for the day-to-day decisions made in the operation of the holding.
- If the holding is operated as a partnership, enter the name and address of one of the partners. (For other partners see Question 4.)
- Please be sure only one Agricultural questionnaire is completed for this holding.

- Name and mailing address of the operator (Owner, tenant, or hired manager)

# RECENSEMENT DE L'AGRICULTURE, 1981

## To English-speaking persons:

If this questionnaire in the French language has been left with you in error, and you wish to complete a questionnaire in English, please call the long distance operator and ask for ZENITH 0-1981 starting May 28th 9 a.m. to 9 p.m. You will then be connected to the nearest Census office, without charge. That office will arrange for the English version of the questionnaire to be delivered to you.

## Caractère légal et obligatoire

Le recensement du Canada est mené en vertu de la Loi sur la statistique qui oblige chacun à fournir les renseignements demandés.

## Confidentialité

Les renseignements fournis demeureront confidentiels et ne serviront qu'à produire des statistiques. Personne ne verra vos réponses sauf des employés assermentés de Statistique Canada. Les personnes assermentées en vertu de la Loi sur la statistique s'exposent à des poursuites et sanctions si elles dévoilent des renseignements personnels fournis lors du recensement.

## DIRECTIVES

- Remplissez ce questionnaire si vous exploitez une ferme, un ranch ou une autre exploitation agricole dont les ventes de produits agricoles se sont élevées à \$250 ou plus au cours des douze derniers mois.
- L'exploitation comprend toute la superficie que vous exploitez, quel qu'en soit le propriétaire et l'emplacement.
- La production agricole comprend l'un ou l'autre des produits suivants:
  - bétail et volailles
  - produits laitiers et oeufs
  - grandes cultures
  - fruits ou légumes
  - champignons, produits de serre et de pépinière
  - animaux à fourrure
  - miel et cire d'abeille
  - produits de l'érable
- Répondez à toutes les questions qui se rapportent à votre exploitation. Mettez un "X" dans les cases "Oui", "Non" et "Aucun(e)" quand il y a lieu.
- Si possible, consultez vos dossiers; autrement, donnez une estimation aussi précise que possible.
- N'indiquez pas les fractions, sauf quand on le demande.

- Si vous avez besoin de renseignements, demandez à la téléphoniste de composer ZENITH 0-1981; vous serez alors mis en communication, sans frais, avec le bureau de recensement le plus près.

## Nota:

- Si vous désirez déclarer la superficie en unités métriques, cochez la case "Métrique" ci-dessous et donnez vos réponses en unités métriques (hectares au lieu d'acres, mètres carrés au lieu de pieds carrés).

"Métrique" ☐ 024

- Dans certaines régions du Québec, la superficie des terres est exprimée en arpents. Si votre exploitation se trouve dans une de ces régions, cochez la case "Arpents" ci-dessous et donnez vos réponses en arpents.

"Arpents" ☐ 025

VEUILLEZ REMPLIR CE QUESTIONNAIRE, LE 3 JUIN 1981 ET LE CONSERVER  
JUSQU'À CE QUE LE RECENSEUR PASSE LE REPRENDRE.  
NE L'ENVOYEZ PAS PAR LA POSTE.

## Section 1 — EXPLOITANT ET RÉSIDENCE, LE 3 JUIN 1981

- L'exploitant est la personne qui prend au jour le jour les décisions nécessaires à la bonne marche de l'exploitation.
- S'il s'agit d'une exploitation agricole en nom collectif, écrivez le nom et l'adresse d'un des associés (voir la question 4 pour les autres associés).
- Assurez-vous qu'un seul questionnaire agricole soit rempli pour cette exploitation.

- Nom et adresse postale de l'exploitant (propriétaire, locataire ou gérant)

4. Faites un (x) dans la case qui décrit le mieux cette exploitation:

1 ☐ Ferme individuelle ou familiale (à l'exception des sociétés en nom collectif et des corporations). —————> Passez à la Section III

Société en nom collectif:

2 ☐ avec convention écrite, ou

3 ☐ sans convention écrite (entente verbale)

• Inscrivez le nom et l'adresse de l'associé dans l'espace ci-dessous. S'il y a plus d'un associé, utilisez la section "Remarques" à la fin du questionnaire.

• Assurez-vous qu'un seul questionnaire agricole soit rempli pour l'exploitation d'une société en nom collectif.

Corporation (compagnie juridiquement constituée):

4 ☐ dont la plupart des actions appartiennent à vous et à votre famille, ou

5 ☐ dont la plupart des actions appartiennent à d'autres personnes ou entreprises.

• Inscrivez le nom et l'adresse du siège social de la corporation ci-dessous.

Autres formes juridiques:

6 ☐ Institution

7 ☐ Pâturage communautaire

8 ☐ Colonie huttérite

9 ☐ Autre - (précisez) \_\_\_\_\_

• Inscrivez le nom et l'adresse de l'établissement ci-dessous.

## Section III - EMPLACEMENT, SUPERFICIE ET VALEUR, LE 3 JUIN 1981

5. Emplacement • Inscrivez séparément chaque lot, section ou partie de section. Comptez toute terre exploitée, qu'elle vous appartienne ou qu'elle soit prise en location à bail ou autrement.

• Ne comptez pas les terres données en location.

• Ne comptez pas les terres qui sont utilisées en vertu d'un permis ou d'un droit de pacage par tête de bétail (pâturage communautaire, terres de la Couronne, etc.).

• Indiquez toujours en premier lieu la parcelle où se trouve le siège de l'exploitation (principaux bâtiments ou entrée principale).

• Si un gérant de ferme exploite une terre appartenant à son employeur, indiquez la terre comme étant possédée en propre. Si l'employeur prend la terre en location (à bail ou autrement), il faut l'indiquer comme telle.

• Dans les régions où il est possible de fournir une description de la terre, assurez-vous que cette description est précise et complète afin qu'on puisse localiser la terre sur une carte.

• Si vous manquez d'espace, utilisez la section "Remarques" à la fin du questionnaire ou joignez une feuille distincte.
